Simi Shrivastava

Columbus, OH | (240) 726-2996 | simishrivastava111@gmail.com | linkedin.com/in/simi-shrivastava | simi-shrivastava11.github.io

SUMMARY

Data analytics professional with five years of experience in client reporting, data quality, ETL, and statistical and ML modeling. Owned Power BI and Tableau reporting for stock exchange clients, automated reconciliation workflows, and delivered ML tools, 20M+ record pipelines, and dbt, forecasting, A/B testing, and AWS projects. MS in Data Science, University of Maryland.

TECHNICAL SKILLS

- **Languages & Data:** SQL, Python (pandas, scikit-learn, statsmodels), PySpark, Snowflake, dbt, Databricks, ClickHouse, DuckDB
- **Statistics, ML & Data Quality:** Hypothesis testing, regression, time-series forecasting (Prophet, LightGBM), A/B testing, classification (kNN, decision trees), anomaly detection, reconciliation, data validation
- **Cloud & Tools:** AWS (EC2, ECS/Fargate, S3), Docker, Flask, Jenkins CI/CD, Git, Jira, Confluence, Agile/Scrum
- **BI & Reporting:** Tableau, Power BI, Excel/VBA, Streamlit
- **AI Tools:** Claude, ChatGPT, Gemini, GitHub Copilot, Cursor

EXPERIENCE

Data Science Intern | Canaria, US **Jun 2025 - Aug 2025**

- Migrated the compensation benchmarking pipeline from pandas to **PySpark**, **ClickHouse**, and **Parquet** to handle the data volume, processing **20M+ records** across 15+ job boards and ATS feeds.
- Implemented **anomaly detection** and quality checks in **Python** against BLS benchmarks to catch bad data before delivery.
- Integrated Census, BLS, and county-level data to standardize geography and improve regional salary accuracy.

Data Analyst | Cognizant Technology Solutions (client: LSEG), India **Nov 2019 - Jul 2024**

- Owned **Power BI** and **Tableau** reporting on index performance and data quality, reviewed biweekly with clients, and presented recommendations ahead of each monthly rebalancing.
- Replaced an **8-hour** manual reconciliation with an **Excel/VBA**, **API**, and **SQL** workflow that runs in **under 5 minutes**.
- Debugged index mismatches at each rebalance, tracing most to a wrong index version or bad input, before client delivery.
- Developed a **kNN** and **decision-tree** tool to sort failed checks into real issues versus environment noise, cutting review time from **1,500 to 4 minutes** per hundred checks, about **$14K a month**.
- Led the build of a project documentation portal that saves roughly **7-8 hours** of knowledge transfer per new hire.
- Mentored new hires and junior analysts in SQL and Python, and documented team processes in **Jira** and **Confluence**.

PROJECTS

Causal Demand Forecasting & Promotion ROI Analytics | *Python, dbt, Snowflake, PySpark, Streamlit*

- Engineered a **dbt** project on **Snowflake** with staging and mart layers and 9 automated data quality tests to prepare clean sales data for measuring a retail promotion's impact.
- Estimated the promotion's true effect with **OLS counterfactual modeling**, comparing actual sales to expected normal demand and finding a **5% lift**.

Product Experimentation Analytics: A/B Test Framework | *SQL, DuckDB, Python, Tableau*

- Designed an **A/B testing** pipeline with a SQL metric layer in **DuckDB** and automated checks for uneven splits, duplicate users, and pre-test leakage to keep conversion results trustworthy.
- Measured a **3.85 percentage point conversion lift** on real transactions, reported by segment in a Tableau dashboard.

YOLOv8 Object Detection via AWS ECS Fargate | *Flask, YOLOv8, Docker, AWS (ECR, EC2, ECS Fargate)*

- Deployed a containerized **Flask** API serving **YOLOv8** as a **Docker** image in **ECR** on **EC2** and **ECS Fargate** to compare reliability.
- Load-tested both across four traffic levels: **0% failed requests** on Fargate at every level versus **22.3%** on EC2 under quiet load.

EDUCATION

University of Maryland, College Park | M.S. Data Science | GPA: 3.86/4.00 **Aug 2024 - May 2026**

Teaching Assistant for Data Science (CMSC320, DATA602, DATA200) and Break Through Tech AI, Cornell Tech.

Coursework: *Data Representation & Modeling, Probability & Statistics, Machine Learning, Big Data Systems, Deep Learning, Cloud Computing, Natural Language Processing, Communication in Data Science*

Certifications: *Databricks Fundamentals (Lakehouse architecture, Delta Lake, data ingestion pipelines)*

CSVTU, India | B.E. Electronics and Telecommunication | GPA: 8.53/10.00 **Jul 2015 - May 2019**
